

## Poll Results 2022

### Qutr#1 Moon Prospecting

Do you think prospecting on the Moon could solve the energy- and raw material crises on Earth in the long run?

Yes, it is the only way to solve our problems in the future. 33%

No, the money is better invested on Earth. 66%

### Qutr#2 Ukraine in Space (1)

Do you think the Ukrainian/Russian conflict will have severe consequences on funding and schedule for the Artemis/Lunar Gateway project and going to the Moon to stay?

Yes, it will have consequences. 100%

No severe consequences.

### Qutr#3 Ukraine in Space (2)

Having learned about Ukraine's contributions to space exploration from the very beginning – Sergei Korolev was Ukrainian after all – what are your feelings about future contributions of the State Space Agency of Ukraine (SSAU)?

Optimistic? No vote

Pessimistic? No vote

### Qutr#4 Solar Generators in Orbit

A solar generator in Earth orbit could deliver energy to Earth 99% of the time unhampered by weather, daytime or night conditions. NASA, ESA, Japan and China are developing plans to install orbiting solar generator plants to become CO2 neutral by 2050.

Is this realistic?

YES – we are ready.

No – too ambitious. 100%
